Sustainable Cities Program

The Keep Australia Beautiful NSW Sustainable Cities Program is the leading community and environmental awards program for metropolitan communities. It is now a National program and more than any other metropolitan based environmental program inspires, supports and recognises environmental enthusiasts who make a genuine and lasting contribution to their area.

City of Canada Bay Council was announced the 2009 Overall Sustainable Council in last year's Sustainable Council Awards. Their achievements were further recognised when they went on to become the National Winner of the Keep Australia Beautiful Sustainable Cities Award. Congratulations!
